

# Funding Newsletter May 2026

## **Calisen Impact Charitable Trust**

The Calisen Impact Charitable Trust funds UK charities whose projects deliver positive environmental, social, or wellbeing outcomes. Its funding priorities are closely linked to sustainability, inclusion, and community development, reflecting Calisen's wider focus on creating a "smarter" and more sustainable future.

The trust supports initiatives that help achieve UK climate targets, move towards zero emissions, and create a more sustainable energy system. It is also interested in projects that promote inclusive, safe, and diverse educational and working environments, alongside programmes that contribute to the economic and social development of communities where Calisen operates.

Funding is available to eligible UK charities for projects based in the UK that align with the trust's values and objectives.

## **Becht Foundation**

The Foundation provides support to organisations working to protect and restore the marine environment.

They consider projects that meet the following key criteria:

Alignment with our mission – The project must have a clear and direct focus on the protection and restoration of biodiversity through marine conservation or climate communications.

Measurable KPIs and outcomes – Projects must define specific, measurable outcomes that represent a clear step forward in marine conservation or climate action.

Phased budget and timetable – Proposals should include a phased budget alongside a realistic timeline for achieving key performance indicators (KPIs).
